(54) DISK ADAPTER

(57) Abstract:

PROBLEM TO BE SOLVED: To provide a disk adapter for reproducing a card type compact disk well by a CD player in which a recessed part matched with the outer periphery of the disk is formed to position the disk.

SOLUTION: This disk adapter has an outer peripheral surface 2 having the same diameter as that of a large-diameter disk, and an opening 3 having a shape roughly identical to that of a disk 10 formed in its center. A movable engaging part 6 having a catch 6a for applying an elastic force toward a center and locking the disk 10 is formed in the center of each of the opposite two sides 5 of the opening 3, a fixed engaging part 7 having a catch 7a for locking the upper side of the disk 10 is formed in the center of each of the remaining two sides 4 of the opening 3, and regulating members 9 for supporting the disk are provided in both sides of

the disk are provided in both sides of
the fixed engaging part 7.
